Course Overview

The **AHC51120 Diploma of Conservation and Ecosystem Management** prepares students for skilled and paraprofessional roles in environmental management.

This qualification equips learners to work in areas such as ecosystem restoration, Indigenous land management, wildlife management, and marine conservation. It emphasizes practical knowledge in managing natural resources, allowing graduates to address complex environmental challenges and support ecosystem sustainability

Course Units

AHCOCM303 Follow Aboriginal and/or Torres Strait Islander cultural protocols

AHCCSW501* Survey and report on Aboriginal and/or Torres Strait Islander cultural sites

AHCOCM504 Develop strategies for on Country management

AHCLPW507 Implement natural and cultural resource management plans

AHCECR506 Develop and implement sustainable land use strategies

CUAFIM511 Source funding for projects

AHCBER504 Manage the implementation of a biosecurity emergency control program

AHCECR503 Design an ecological restoration project

AHCPMG508 Develop a system to monitor and evaluate the pest management plan

AHCNRM509 Develop a coastal rehabilitation strategy

Skill Sets (Micro Credentials)

Skill Sets are combinations of units of competency which link to a licence or regulatory requirement or defined industry need. This program offer specialised accredited skill sets from the program start date to advance our students quality employment options.

- AHCSS00117 Introduction to Conservation and Ecosystem Management Skill Set

Qualification Outcomes

Graduates of this diploma course will be equipped to perform operational, managerial, and technical roles in conservation and land management. They will acquire specialised skills in areas like conservation works, park administration, and water management, enabling them to contribute to various environmental and ecosystem management projects in diverse settings.

Skills and Knowledge Development

Upon completion of the course participants will be able to:

- Survey and report on Aboriginal cultural sites.
- Prepare a design for an ecological restoration project in conservation or for ecosystem management.
- Develop and implement sustainable land use strategies that lead to improved ecological sustainability of land under production.
- Develop awareness of, and apply the protocols of Aboriginal culture, including the need to identify the appropriate persons when approaching a community and the cultural and social protocols associated with that task.
- Develop strategies for contemporary land or sea management from an Indigenous perspective.
- Implement natural and cultural resource management plans.
- Develop a pest monitoring and evaluation program for a local or broader regional area.
- Manage and implement a biosecurity emergency control program.
- Prepare a fauna management plan, including controlling or maintaining fauna populations.
- Develop, implement and evaluate a rehabilitation strategy for a natural area in a coastal zone.

Career Outcomes

- Ecosystem Restoration Specialists
- Parks Ranger or Parks and Wildlife Manager
- Indigenous Land and Sea Management Officer
- Conservation Project Manager
- Environmental Consultant
- Natural Resource Manager

Entry Requirements

There are no entry requirements for this qualification.

About Envirotech

Envirotech Education is an award-winning Australian Registered Training organization (RTO) endorsed by the Australian Skills Quality Authority (ASQA) for delivery of Vocational Education and Training (VET).

Envirotech VET accreditations are offered to: Domestic, Indigenous, international, and school students.

Envirotech has in-house expert trainers, mentors, and business developers, that are dedicated to connecting students to an industry journey and the development of real business initiatives and sustainable projects.
